FACT SHEET SEMPERGREEN®
SEDUM PLUGS

MATERIAL
The Sedum plugs grow in a special substrate developed by Sempergreen®. The plants are cultivated as plug plants in trays of 72 plants each. Plugs can be planted on extensive roof garden substrates. Sempergreen® Sedum plugs are produced in accordance with FLL guidelines.

ABOUT SEDUM
The sebaceous Sedum plants are adept at storing water in their leaves and are therefore extremely suitable to various weather conditions.

INSTALLATION AND MAINTENANCE
Sempergreen® Sedum plugs are very easy to install. They can be installed on sloping surfaces of up to 45 degrees (depending on the build-up of the system). Their (minimum) maintenance also depends on the build-up of the system (fertilise one to three times per year).

ASSORTMENT (SELECTION)
- Sedum acre
- Sedum album ‘Coral Carpet’
- Sedum album ‘Murale’
- Sedum floriferum ‘Weihenstephaner Gold’
- Sedum hybridum ‘Immergrünen’
- Sedum kamtschaticum
- Sedum reflexum ‘Blue Spruce’
- Sedum spurium ‘Coccineum’
- Sedum spurium ‘Summer Glory’
- Sedum sexangulare
- Sedum stoloniferum
- Sedum takesimense

TECHNICAL DATA:
- Plug size: diameter: approx. 4 cm
- Plug height: approx. 5 cm
- Number of plugs per m²: 16 to 24 plugs
- Number of plugs per tray: 72 plugs
- Number of plugs per pallet: 5000 plugs
- Pallet size: 80 cm x 120 cm
